PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building web applications using React.js, Next.js, Node.js, and MongoDB. Experienced in developing scalable frontend interfaces, REST APIs, authentication systems, and business applications. Strong focus on building reusable solutions that improve development speed and user experience.

RELEVANT EXPERIENCE

ITDose Infosystem, Sector 6, Noida

Oct 2025 - Present

Frontend Developer

- Developed and maintained multiple core modules for a large-scale healthcare platform using React.js and Redux Toolkit, handling complex medical and laboratory data.
- Built intuitive interfaces for doctors and technicians to enter test results and generate patient reports, simplifying day-to-day laboratory workflows.
- Developed a dynamic Report Builder with drag-and-drop functionality, allowing users to customize report layouts, spacing, tables, fields, and styling without code changes.
- Reduced report development and client customization time by around 50%, allowing teams to quickly create and deploy client-specific report templates while reducing dependency on developers for routine changes.

Radoms Digital Pvt. Ltd, Greater Noida

May 2024 - Oct 2025

Full Stack Developer

- Litconnect:** Developed backend APIs for a platform connecting authors and publishers, including user authentication, pitch management, and user interactions.
- Implemented authentication using AWS Cognito and built backend services using Node.js and MongoDB.
- Integrated Firebase Cloud Messaging for push notifications and deployed services using AWS ECS.
- Newstapri:** Built a news and quiz platform from scratch using the MERN stack.
- Developed a custom admin dashboard that made content management around 40% faster, allowing the team to publish and manage content more efficiently.
- Radoms Digital:** Built a modern company website using Next.js and Framer Motion.
- Optimized the application and improved page loading performance by around 30%, resulting in a smoother user experience.
- E-commerce Platform:** Built a full-stack e-commerce platform with separate customer and staff applications, supporting 1,000+ products and automated order workflows.
- Implemented JWT authentication and role-based access control using Next.js, React.js, Node.js, Express.js, and MongoDB.
- Integrated Razorpay for online payments.
